PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience in building responsive web and mobile applications using React JS, React Native, JavaScript (ES6+), HTML5, CSS3, and Redux Toolkit. Skilled in UI development, API integration, state management, and developing scalable solutions for projects including ERP systems, service booking applications, and admin dashboards. Passionate about creating user-friendly applications, improving performance, and continuously learning new technologies.

TECHNICAL SKILLS

Frontend Technologies: React JS, React Native, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Expo, GSAP

UI & Styling: Tailwind CSS, NativeWind, Bootstrap, Shadcn, Cross-Platform UI Development

Backend & APIs: RESTful APIs, API Integration, Axios, Tanstack Query, CRUD Operations, Authentication (JWT)

Databases: SQL (Basic), MongoDB (Basic)

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman, Expo EAS Build

Programming Languages: JavaScript, Typescript

Core Concepts: Component-Based Architecture, State Management, Problem Solving, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

Frontend Developer | *Infosai Software Company* — Nagpur, Maharashtra

August 2023 – October 2025

- Developed responsive and user-friendly web and mobile applications using React.js and React Native, ensuring smooth performance across different devices and screen sizes.
- Worked on live projects including ERP systems, admin panels, and service booking applications with focus on clean UI and usability.
- Integrated RESTful APIs using Axios and Redux Toolkit for handling dynamic data, authentication and user-related functionalities.
- Built reusable components and managed application state efficiently using Redux Toolkit to improve scalability and maintainability of applications.
- Implemented modern UI designs using Tailwind CSS, Nativewind, Bootstrap, and responsive design principles to create interactive user experiences.
- Collaborated with teams using Git and GitHub, fixing UI issues, and improving overall application performance and responsiveness.

Trainee Intern | *Tantransh Solutions* — Nagpur, Maharashtra

February 2023 – August 2023

- Learned and worked with Git and GitHub for version control, code management, and team collaboration during the internship period.
- Developed responsive UI tasks using HTML, CSS, and JavaScript, focusing on clean design, responsiveness, and user experience.
- Built the frontend of the company's portfolio website using React.js with reusable components and responsive layouts.
- Integrated backend APIs into the React.js application to display dynamic content and ensure smooth frontend-backend communication.
- Worked closely with the backend team to connect APIs and implement required functionalities based on project requirements.
- Successfully deployed the portfolio website online and gained hands-on experience working on a real-world live project environment.

Rollout Senior Manager (Non Technical) | Velocis Private Limited — Vasco, Goa

March 2018 – March 2022

Field Engineer (Non Technical) | Yoso Engineering & Supplies — Vasco, Goa

December 2017 – February 2018

PROJECTS

Service Booking App - Kamke | React Native · Expo · Nativewind · Redux Toolkit · Google Maps Api

- Developed a multi-role service booking and marketplace mobile application using React Native and Expo, where I designed and implemented the complete frontend UI for Customer and Seller roles.
- Integrated Google Maps and location-based search features to display nearby services and products, along with service booking and quote comparison functionalities.
- Implemented role-based authentication and dynamic navigation flows for Customer, Seller, Service Provider, and Manufacturer dashboards using Redux Toolkit and API integration.
- Built responsive and user-friendly interfaces with seamless frontend–backend communication for services, products, booking requests, and seller product management.

Infosai Software Company Portfolio Website | React JS · Tailwind CSS

- Developed the company portfolio website using React.js and Tailwind CSS with a clean, modern, and fully responsive design for mobile, tablet, and desktop devices.
- Built reusable React components to improve maintainability, scalability, and consistency across the website.
- Implemented form state management and integrated email notification functionality to send confirmation emails after successful form submission.
- Successfully deployed the website online using GoDaddy hosting and participated in testing and UI optimization before deployment.

Right Choice Bike Bazar Website | HTML · CSS · Javascript

- Developed a responsive business website for Right Choice Bike Bazar using HTML5, CSS3, and JavaScript with a clean and user-friendly interface.
- Designed and implemented responsive layouts optimized for mobile, tablet, and desktop devices to ensure a smooth browsing experience.
- Added interactive UI elements and structured web pages to improve usability and overall website presentation.

Dairy ERP Application | React JS · Redux

- Developed a dairy management dashboard using React.js to manage products like milk, curd, ghee, and other dairy inventory items efficiently.
- Implemented role-based access management where admins could create user credentials and assign modules based on different user roles.
- Built inventory tracking and daily report generation features to help manage stock, product records, and operational activities effectively.
- Integrated APIs and developed responsive dashboard UI components for smooth data management and user interaction.

EDUCATION

B.Tech in Computer Science Engineering

Don Bosco College of Engineering, Goa Fatorda — August 2012 – August 2017

CERTIFICATIONS

- Basic Python | Livewire Institute | May 2022 - July 2022
- MERN Stack | Livewire Institute | August 2022 - December 2022
